

**Site support**

**High Pressure Testing**

**Non Destructive Testing**

**Maintenance management software**

**Maintenance, Inspection & Certification**

WFR is a full range maintenance service provider to the oil & gas and petrochemical industries. With an experienced and multi skilled team WFR can take care of any maintenance requirement clients might have.

### **MAINTENANCE, INSPECTION & CERTIFICATION**

WFR can perform maintenance (E&I, Mechanical, Hydraulic, Pneumatic), inspection and certification of a wide range of static and rotating equipment.

Capabilities include:

- Piping
- Pumps
- Separators
- Ex equipment
- Hydraulic units
- Valves & chokes
- Pressure vessels
- Generators/engines
- Manifolds (choke/kill)
- Sensors, controls & transmitters
- BOP's (drilling & well intervention)
  
- High Pressure Testing of Pipework, Pressure vessels, Valves and Chokes
  
- Non Destructive Testing
  - Ultrasonic Testing (UT)
  - Liquid Penetrant testing (PT)
  - Magnetic Particle Inspection (MPI)
  - Approved inspection procedures by notified bodies & major oil companies

### **SITE SUPPORT**

WFR can support clients with personnel, equipment or a combination of both for a wide variety of on-site jobs:

- NDT inspection
- Torque & Tensioning
- Well Testing support
- Well Test rig-up/rig-down
- Pressure testing of equipment and (process) piping
- (Dis)Assembly of Process equipment (piping, appendages, E&I).

Experienced personnel can install equipment in the safest and most efficient way possible and in accordance with all HSE requirements.

### **SITE & MAINTENANCE PROJECT COORDINATION**

WFR provides the technical expertise to properly handle all the phases of the project, ensuring that equipment/assets are expertly cared for.

The execution of the project is based on clear processes and communication, making sure that the job is done according planning and on budget

### **MAINTENANCE FACILITY**

The facility in Schoonebeek enables us to carry out services on equipment up to large dimensions and weights.

- **3 Large maintenance workshops**

The surface area available for maintenance and storage ranges up to 12500 M2.

This includes:

- Indoor maintenance area 2500 M2
- Overhead cranes up to 2 x 10 mT
- Multiple test bays up to 20.000 psi
- Fully outfitted

- **Equipment handling**

- Forklifts till 20 ton capacity
- Heavy cargo trailers

### **CERTIFICATION & MAINTENANCE MANAGEMENT SOFTWARE**

WFR can manage and register maintenance of your equipment in our webbased maintenance system. Designed with efficient maintenance in mind, it accommodates all information required to give you a proper insight in maintenance status and costs.

### PERSONNEL

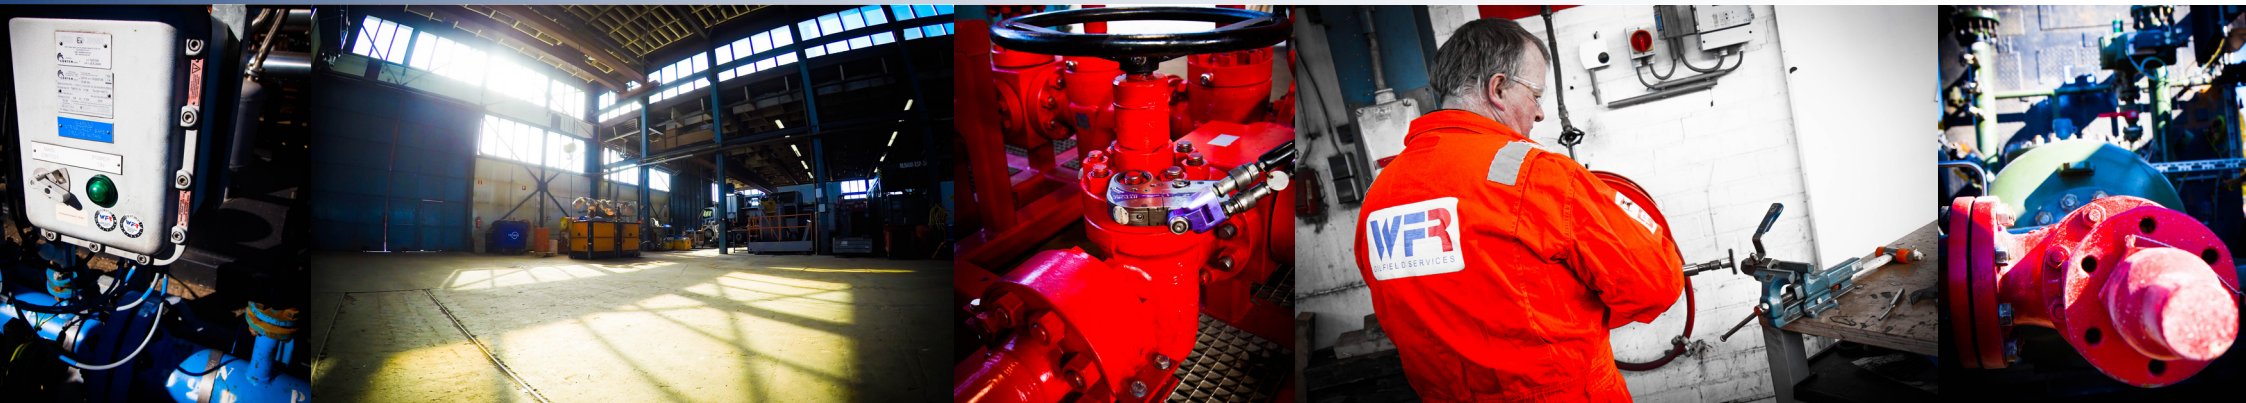

Our competent team has extensive training and experience to carry out maintenance or provide on-site support (24/7), this includes:

- BOSIET
- IWCF (Well Control)
- Torque & Tensioning (WfrPtt)
- CompEx (Ex maintenance)
- ISO9712 (MPI, UT & PT) - Level II
- Equipment specific training

### QUALITY & HSE

In addition to ISO9001 & OHSAS certification for quality and safety, our maintenance service is carried out according a specific standard (RS01). This unique standard is third party certified according Mode II by Bureau Veritas.
